

Getting specific columns value from Database

```
list.forEach(  
    row->{  
        for(Object obj:row){  
            System.out.print(obj+"\t");  
        }  
        System.out.println();  
    }  
)
```

Getting One columns value from Database

```
list.forEach(  
    row->{  
        for(Object obj:row){  
            System.out.print(obj+"\t");  
        }  
        System.out.println();  
    }  
)
```
